

My methods to discover the essence and fundamentals of form, of matter, of color, of visual, structural, textural relationships, are in its deepest sense a personal quest, an inner drive to examine and reflect on the life of order and chaos in ourselves and in the cosmos.

This existential exploration of self and the world we live in manifests itself as a visual tapestry of experiences that expresses the searching, the wrestling, the confrontation with personal attitudes, ideology, philosophy and expectations that are constantly shaped and redefined by life's contradictions and available or accidental possibilities.

In the creative challenge I have chosen to follow, examine and express in my artworks, my focus emphasizes a realistic and abstract vision and visualization of form and matter, my artistic process enables me to communicate and realize a profound sense of personal freedom, diversity of choice, social, religious and spiritual affirmation.
